

# SELF-DEFENSE FOR CORPORATE EXECUTIVES

SELF-DEFENSE FOR CORPORATE EXECUTIVES is designed to offer businessmen and women realistic tactical survival options if confronted by an assailant. Most successful business professionals lead very busy, stressful, deadline, bottom line, oriented lifestyles, which distracts them from the “realities” around them. They are often targets because the trade secrets they possess, the influence they have over others, the enemies they make (competition) and random criminal activity. Most executives do not warrant protective details and yet are as vulnerable if not more so. Today’s corporate executive must be his/her own personal protection specialist (bodyguard). All training is private, discrete and professional.

SELF-DEFENSE FOR CORPORATE EXECUTIVES covers topics such as:
